Adapting Open Source LMS Software for Business Training

Dave Lewis
eTechnology Consultants
Introduction

Dave Lewis

• Masters in Learning and Technology
• Working on a doctorate in Educational Technology
• 25 years in teaching and training in both public and private sector
• Adjunct faculty BSU, NNU, CWI
• Member of ASTD, eLearning Guild, ISTE
Agenda

• Survey
• Define terms
• Options
• Choosing LMS
• Install demo
• Customizing LMS
• Final thoughts
• Q&A
Survey

• Current employment situation
  – Corporate
  – Consultant
  – Academia
  – Other
Survey

• Current position
  – Administration/
    Supervisor/
    Manager/
  – Information Technology
  – Training
  – Changes daily
Survey

• Current LMS status
  – Have a solution
  – Considering implementing
  – What’s an LMS - I was looking for the donuts?
What is Open Source?

open-source

1. Computers. pertaining to or denoting software whose source code is available free of charge to the public to use, copy, modify, sublicense, or distribute.

2. pertaining to or denoting a product or system whose origins, formula, design, etc., are freely accessible to the public.

http://dictionary.reference.com/browse/open+source?s=t
What is Open Source?

1. Computers. pertaining to or denoting software whose source code is available free of charge to the public to use, copy, modify, sublicense, or distribute.

2. pertaining to or denoting a product or system whose origins, formula, design, etc., are freely accessible to the public.

http://dictionary.reference.com/browse/open+source?s=t
Examples of Open Source software:

Desktop

- 7-Zip
- Audacity
- Blender
- Calibre
- GIMP
- GNOME
- KDE
- OpenOffice/LibreOffice
- PDFCreator
- Ubuntu
- VLC
Examples of Open Source software:

- Apache
- FileZilla
- Joomla
- Magento
- Moodle
- Mozilla Firefox
- MySQL
- PHP
- WordPress
- Zencart
What is a Learning Management System (LMS)?

a software application for the administration, documentation, tracking, reporting and delivery of education courses or training programs.

http://en.wikipedia.org/wiki/Learning_management_system
Why use an LMS

Comparing training methods, eLearning tools allowed organizations annual savings of 21%, according to the American Society for Training and Development (ASTD).
Why use an LMS

An LMS can address three of the “four pillars” of talent management discussed in Jessica Twentyman’s article in Financial Times - Apr 20, 2011

- Recruitment
- Performance management
- Learning and development
- Compensation management
Commercial options

Pearson

Blackboard

Raptivity

Integrated Education Management System

Inmedius LMS/Omnibus
Open Source LMS options

- Canvas
- Chamilo
- Dokeos
- Sakai
- eFront
- Xerte
- Moodle
Hosting options

Self hosted

General Internet Host Provider (SaaS)

Specialized Hosting Providers (SaaS)
Hosting options

Self hosted

– Buy/build server
– Install base operating system (probably Linux)
– Install and configure Moodle
  • Configure for access external if needed
  • Configure backups
– Install management software as needed
Hosting options

Self hosted
Hosting options

General Internet Host Provider (SaaS)

– Select hosting provider
– Install and configure Moodle
  • Configure backups
Web Hosting Top 10 List. Web hosting reviews

Our list of top 10 web hosts offers a rating of best hosting providers, the most reliable, feature-rich, well known web hosts that offer affordable hosting services at the lowest prices possible, including reviews of their services combined in top 10 web hosting services table.

Every provider of the following best web hosts in top 10 list offers:

- PHP/MySQL support, offering PHP 5 and MySQL 5 database;
- Microsoft FrontPage extensions support;
- multiple POP3 and IMAP email accounts with web-mail support;
- multiple subdomains and parked/add-on domains;
- website building tools with free web page templates;
- unrestricted FTP access with multiple FTP accounts;
- web site stats, virus & spam protection, CGI, Perl, SSL support;
- at least 30 days money back guarantee;
- professional 24x7 technical support via email and/or by phone;
- and at least 99.9% network uptime guarantee.

The top ten web hosting ranks in the table below are based on (a) our site visitors preferences, (b) offered webhosting features and (c) best web hosting prices. Web host general reliability, network & server uptime, quality of customer support are also taken into consideration.
## Top 10 Web Hosting providers comparison

Check chosen by PRcheckers.info editors **top 10 hosting** providers compared in the table below.

</table>
Hosting options

Specialized Hosting Providers (SaaS)

– Select hosting provider
– Tell them want you want
– Sign the contract and log in when they are done
Learning Management System Acquisition Decision Matrix

List the Learning Management Systems you are considering in the left hand column. List the characteristics or attributes that are important to your decision in the center columns. Fill in the weight/importance that each characteristic has in your decision making process in the Weight box below each characteristic.

Based on your research into the LMS options you are considering, rate each option on a scale of 1-10 or 1-Rof options in the Raw box of each characteristic as it applies to your organization. (1 not acceptable, 10 best of available options)

<table>
<thead>
<tr>
<th>LMS Options:</th>

Learning Management System Acquisition Decision Matrix

List the Learning Management Systems you are considering in the left hand column. List the characteristics or attributes that are important to your decision in the center columns. Fill in the weight/importance that each characteristic has in your decision making process in the Weight box below each characteristic.

Based on your research into the LMS options you are considering, rate each option on a scale of 1-10 in the Raw box of each characteristic as it applies to your organization. (1 not acceptable, 10 best of available options)

A SCORM package is a collection of files which are packaged according to an agreed standard for learning objects. The SCORM activity module enables SCORM or AICC packages to be uploaded as a zip file and added to a course.

Content is usually displayed over several pages, with navigation between the pages.

There are various options for displaying content in a pop-up window, with a table of contents, with navigation buttons etc. SCORM activities generally include questions, with grades being recorded in the gradebook.

SCORM activities may be used:

- For presenting multimedia content and animations
- As an assessment tool

### Activities (159)
- The main student activities in a course
  - Assignment (13)
  - Database (5)
  - Workshop (13)
  - Quiz (43)
  - SCORM (0)

### Blocks (165)
- Useful tools to add to courses or home pages

### Themes (67)
- Change the look and feel of your site or course

### Filters (22)
- Filters can process and change text

### Reports (13)
- Report plugins for administrators, teachers and general users
  - Admin reports (0)
  - Course reports (0)

### Gradebook (6)
- There are several ways to extend the gradebook
  - Grade reports (1)
  - Gradebook (3)
  - Import (0)
  - Grading methods (2)

### Cache (3)
- Contains plugin types for the Moodle Unified Cache (MC)
  - Locks (1)
  - Stores (1)

### General plugins (Local) (37)
- General plugins go into the /local directory and do not fit into any particular category

### Messaging (1)
- Redirect messages to other places

### Repositories (17)
- Connect to repositories of files

### Portfolios (1)
- Export user content to other systems

### Plagiarism (7)
- Connect to different plagiarism services

### Admin tools (4)
- Provides utility scripts useful for admins to examine and modify a Moodle site (2.2+)

### Other (13)
- Useful code that does conform to any standard plugin type
Uploading / Adding Modules

You need an ftp (File Transfer Protocol) program to move files between local computer or a mapped drive and the Moodle installation.
Uploading / Adding Modules

Upgrade Moodle database now
Upgrading to new version

mod_hotpot

Success

Continue
Upgrading to new version

mod_hotpot

Success

Continue
Upgrading to new version

mod_hotpot

Success

Continue
The settings shown below were added during your last Moodle upgrade. Make any changes necessary to the defaults and then click the "Save changes" button at the bottom of this page.

**New settings - HotPot**

- **Show HotPots on MyMoodle**
  - Default: Yes
  - This setting controls whether HotPots are listed on the MyMoodle page or not.

- **Enable HotPot cache**
  - Default: Yes
  - Maintaining a cache of HotPot quizzes can dramatically speed up the delivery of quizzes to the students. [Clear HotPot cache](#)

- **Enable HotPot cron**
  - Default: None
  - Specify the hours in your time zone at which the HotPot cron script may run.

- **Allow embedding of SWF files in HotPot activities**
  - Default: Yes
  - Allow embedding of SWF files in HotPot activities. If enabled, this setting overrides filter_mediaplayer_enable_cron.
Enable obfuscation of media player code

Default: Yes

Obfuscating the javascript code to insert media players makes it more difficult to determine the media file name and guess what the file contains.

Body styles

Background color and image
Text color
Font size and family
Left and right margin

Default: None

By default, Moodle theme styles will override HotPot activity styles. However, for any styles selected here, the HotPot activity styles will be given priority over the Moodle theme styles.

Frame height

Height: 86 (Default: 85)

When a quiz is displayed within a frame, this value is the height (in pixels) of the top frame which contains the Moodle navigation bar.

Lock frame

Default: No

If this setting is enabled, then the navigation frame, if used, will be locked so that it is not scrollable, not resizable and has no border.

Store the raw XML details of HotPot quiz attempts

Default: No

If this setting is enabled, then the raw XML details of attempts at HotPot quizzes will be stored in the hotspot_details table. This allows quiz attempts to be regraded in the future to reflect changes in the HotPot quiz scoring system. However, enabling this option on a busy site will cause the hotspot_details table to grow very quickly. Clear HotPot details

Maximum number of days for a single calendar event

Days: 6 (Default: 5)

If a HotPot has both an open and a close time specified, and the difference between the two times is greater than the number of days specified here, then two separate calendar events will be added to the course calendar. For shorter durations, or when just one time is specified, only one calendar event will be added. If neither time is specified, no calendar event will be added.

Developing Content For Online Training
Where/when being used
Multitasking
More media and animations will be make it more engaging
More interactive
What’s the Next Step?
The Next Step

• Look at other sites to see what you like/what works
• Find training / take a class
• Talk to an expert
• Talk to stakeholders and define measures of success
• You can use other software to achieve your result but using the right tool makes your job easier (there are modules that will work in Wordpress, Drupal, Joomla but those aren’t designed primarily as LMSs)
